

# This term

Willow class learned about the different animals which live on the farm, cows, ducks, and donkeys! They learned as well about the different sounds the animals make and what type of food grow on the farm (apple, pear, strawberry). They enjoyed taking care of the plants every morning by watering them -sufficiently- enough!

As the weather became warmer, so did our time outside! We enjoyed exploring all the blooming flowers, trees and bugs which came crawling out!

On the farm the children were super excited to see all the animals which we have been learning about (shouting moo at the cow and oink oink at the pigs!).
